

NOVA.AI

IT ONBOARDING GUIDE

IT Operations

Document Code: NV-IT-001 | Version: 1.5 | Effective Date: 01 April 2026

1. Purpose & Scope

This guide describes the IT provisioning process for new hires at Nova.ai — equipment issuance, system access, and setup timelines — so that every employee is fully productive from Day 1. It applies to all new full-time, part-time, and contract hires across Gurugram, Bengaluru, Hyderabad, and Pune.

2. Pre-Boarding (Before Day 1)

- IT receives the new hire trigger from Talent Acquisition upon offer acceptance, at least 5 working days before the start date.
- A unique Nova.ai email ID and employee ID are provisioned 3 working days before Day 1.
- Laptop, standard peripherals, and access badge are prepared and kept ready at the assigned office location, or couriered to the employee's registered address for remote joiners.

3. Day 1 Provisioning Checklist

Item	Provisioned By	Timeline
Laptop & charger	IT Helpdesk	Day 1, at orientation
Email & calendar access	IT Operations	Day 1, before 10:00 AM
Access badge (office entry)	Admin / IT Security	Day 1
VPN & MFA setup	IT Security	Day 1
HR Portal & Nova Academy access	HR + IT	Day 1
Role-based tool access (e.g., ATS, Git, ERP)	IT Operations + Manager	By Day 3

4. Standard Equipment

Engineering, AI Research, and Product roles are issued a laptop with a minimum 16 GB RAM / 512 GB SSD configuration; all other functions receive a standard 8 GB RAM / 256 GB SSD laptop. A docking station, monitor, and headset are issued to employees on a hybrid or remote arrangement, subject to Head of Department approval for the additional equipment.

5. Remote & Hybrid Connectivity Requirements

Employees working remotely or in a hybrid arrangement (Employee Handbook, Section 4.3) must maintain a minimum internet connection of 50 Mbps download / 10 Mbps upload. IT provides a one-time home-office internet reimbursement of up to ₹3,000, claimed through the Reimbursement Policy process.

6. Access Provisioning & Least Privilege

All system access is granted on a least-privilege, role-based basis per the Information Security Guidelines. Access beyond the default role template requires manager approval via the IT Helpdesk ticketing system, and is reviewed automatically every 90 days.

Mandatory Security Setup on Day 1

Every new hire must complete Multi-Factor Authentication (MFA) enrolment and the Information Security Awareness module on Nova Academy before receiving access to any Confidential or Restricted system, per Section 8 of the Employee Handbook. This cannot be deferred beyond Day 1.

7. Software & Licenses

Standard software (productivity suite, communication tools, endpoint security) is pre-installed before Day 1. Role-specific software (IDEs, design tools, analytics platforms) is requested by the manager via the IT Helpdesk and provisioned within 2 working days, subject to license availability and approval.

8. IT Helpdesk Support

New hires can raise any equipment or access issue through the IT Helpdesk portal, with a standard response SLA of 4 business hours for non-urgent tickets and 30 minutes for tickets marked critical (e.g., inability to log in on Day 1), consistent with the Employee Handbook, Section 10.4.

9. Asset Responsibility

Employees are responsible for the safekeeping of all issued equipment. Loss or damage due to negligence may be recovered from the employee as per the Asset Management Policy. All issued assets must be returned to IT as part of the exit checklist (Employee Handbook, Section 3.6) before full and final settlement is processed.
